

CLARK COUNTY

NEVADA UNITY TEAM SLATE

The **Nevada Unity Team** believes that a strong and unified Executive Board strengthens the Nevada State Democratic Party. This strength will improve fundraising ability, recruit new Democratic candidates for public office, and develop a new generation of activists to build our party.

We are more than a diverse team of Democrats who are running for Clark County at-large positions on the NSDP Executive Board. We are committed to the idea that we have to work together to improve communication between the Executive Board and Democrats in general. We are committed to help transform the NSDP into the most powerful and respected political operation in the Inter-mountain West. This will ultimately lead to continued gains in Democratic voter registration, the election of Democrats within all levels of government and the recruitment of a whole new generation of activists.

For the Nevada State Democratic Party to progress to the next level there has to be a fundamental change in the way that we conduct business. We are committed to making the necessary changes that will make Party operations more transparent and focused. To do this we all have to work together; at-large Executive Board members, officers, staff and Democrats from all over the state.

Our goals are simple: Elect a Democratic President, improve party-wide communication and participation, continue gains in Democratic voter registration, recruit a whole new generation of activists, and elect Democrats in all levels of government this November and in the future.
