## \$630 Million and 140,000 Jobs

### The real cost of illegal immigration

That's right, the cost to the Nevada taxpayers is \$630 million to educate, provide social services, and to incarcerate.

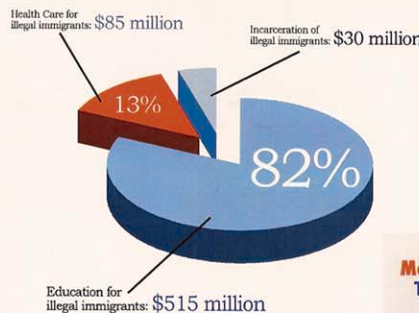

That is just half the story. There are 170,000 illegal immigrants in Nevada's workforce. This while 140,000 Nevada citizens are unemployed according to the Pew Research study. Do the math: If only 1/2 of the working illegal immigrants were replaced by legal citizens, our employment rate would be cut in half from 13 percent to 6.5 percent.

Enough is enough. If the federal government doesn't fulfill its responsibility, then states have the right to step forward. Randy Kirner understands this common sense concept and the importance of jobs for Nevada citizens. He understands that citizens should not be paying for educating, providing social services and incarcerating illegal immigrants. A cost savings of \$630 million could be used for other programs, for example, to enhance education at the K-12 and the university system.

## \$630 Million and 140,000 Jobs

### The real cost of illegal immigration

That's right, the cost to the State of Nevada is \$630 million: Educating, Medicating, and Incarcerating

That is just half the story. There are 170,000 illegal immigrants in Nevada's workforce. This while 140,000 Nevada citizens are unemployed according to the Pew Research study. Do the math: If only 1/2 of the working illegal immigrants were replaced by legal citizens, our employment rate would be cut in half from 13 percent to 6.5 percent.

This \$630 million could be used for other programs and to enhance education at the K-12 through the university system. That's why Pat Hickey will introduce legislation that will make it more difficult for illegal immigrants to work in Nevada, and have them pay more of their fair share for social benefits, if they do.

**Attend Pat's Town Hall Meeting on Illegal Immigration**  
Thursday, May 20th, 2-4PM  
Mckinley Arts Center
